

Vessel Name: *Ecomundi & Ecomundi II - Fish Hunter*

Description

Both vessels are purpose built flats style skiffs by Cairns Custom Craft and offer comfort and stability for use in our northern calm water rivers & estuaries.

Both vessels feature a huge front casting platform for lure and fly fishing, plenty of dry storage space, rod racks / holders, modern electric's, sounder, live bait tanks and comfortable padded seating. Fly rod storage is not a problem as 4 fully rigged rods can be stowed individually and safely under the gunnels.

74lb, 24 volt electric motors are used while lure & fly fishing making manoeuvring near structure and fish holding locations a breeze.

The larger vessel, **Eco Mundi II** is also the ideal river & estuary boat for live bait fishing on share charter days. In this mode it incorporates a three quarter length canopy for shade and weather protection and two swivel chairs mounted on the fore deck.

Owner / operator Terry Holman is one of the best known guides in the region and a fly and lure fishing exponent second to none. Lure & fly fishing specialist (bait fishing share charters also) from the Hinchinbrook to the Daintree River.

Extended charters to remote Cape York and Peter Faust Dam (Lake Proserpine) available upon request.
